Contract: 0xc66c8b40e9712708d0b4f27c9775dc934b65f0d9

Network: Binance Smart Chain

Launched on PCS: 10th May 2021

OVERVIEW

ElonTech (ETCH), a modernized project, was idealized by several tech organizations that was constantly viewing itself Involved / engaged in modernizing Information Technology along with the integration of Blockchain in this era of digitization in the emerging globe.

ElonTech is the first-ever concept in Blockchain and digitization storm that will help underdeveloped and underprivileged countries to be linked with Information Technology and Blockchain ogres along with the concept of Silicon Valley.

ElonTech will offer its coin with an IDO and ICO in partnership with major platforms (such as Polkastarter, PancakeSwap, Uniswap) for easy trading in the market. Aiming at tackling Information Technology gaps, ElonTech will focus on Data Science, Data Engineering, Data Visualization, Robotics, and Advanced Automated Formulas to make a revolution with regards to efficiency and effectiveness in the Blockchain and IT industry. The ultimate goal is to develop **Tech Valleys** around the globe.

HOW WE ARE GROWING

We are growing with our growing community, investors, holders, and most importantly with the achievements of our milestones. We have already made many commitments to our community and investors and we work very hard to fulfill the commitments made within the stipulated time period. We have already fulfilled several commitments and completed several milestones till now and in case of any project delays, we also accept them by open heart and update our community and investors within due time.

SOCIAL NETWORKS GROWTH

ElonTech community is one among the strongly growing and most cherished communities in crypto world. We have a tendency to believe that solely together we are strong. We support each other at every step of the way. Community is everything and ElonTech strives to incorporate everybody from across the globe. Our main social media presence includes Twitter, Telegram, and YouTube channels dedicated to our international communities.

- **Twitter - @ETCHToken**
Our Twitter has a following of 70.4k
- **Telegram - @ETCHToken**
Our main Telegram channel has a number of 34.24k members
- **YouTube - @ElonTech**
Our YouTube channel has a community of 4.92k subscribers

We have conducted a reasonable number of Live AMA sessions on our youtube channel for answering most of the queries raised by our community and will continue to do so. Our live AMA sessions have oriented and educated the community regarding the project and it's vision/mission.

ACTIVE USERS FORECAST

At first, when we started our telegram group, we got a strength of about 200 people in May 2021. Then we reached 400 people in June 2021. Now we have more than 34K dynamic members of the community and approx thousands of them are online at the same time, discussing things and answering queries of others, keeping up the spirit of the community while exchanging ideas and innovations towards Decentralization. We are expecting approximately 50K community members in the first quarter of 2022 and then 10K to 20K more in rest of the quarters of 2022. We would also be hosting more community based activities to encourage more investors and to keep the existing members active.

PRODUCTS PLANNED

1. TechValley
2. NFTs
3. Metaverse
4. Merchandise
5. Crypto Academy
6. Wallet
7. P2P and Exchange
8. Charities / Donations
9. Evolution to Decentralized Autonomous Organization (DAO) or Sub-DAO
10. Launchpad / Incubator for NFT / Metaverse / Crypto / DAO / Web 3.0 / IT projects.

TECH VALLEY CONCEPTS

Imagine a second Earth.

A new valley, the same as Silicon Valley, with the usual lands, buildings and offices but without all the houses that man has built on it.

Now imagine being able to access through a dedicated platform and having the possibility to build, visit, buy and sell all physical assets of Tech Valley through ETCH Coin in just a few clicks.

Being the sole and effective owner of a land where you can "build" your 3D NFT Houses, Building and Lands, thanks to blockchain technology.

From now on, not only will all this be possible - thanks to ElonTech (ETCH) - but it will be the direction in which the whole World will turn.

TECH VALLEY ECONOMY

The Tech Valley economy will operate with ETCH being the exclusive form of currency for purchasable assets such as digital property, NFT's, services, metaverse land etc. ETCH will also be the Governance token for our planned DAO / Sub-DAO platform.

WHY IS TECH VALLEY A SUCCESS?

TechValley is a unique concept with the vision of digitizing the land registry using the blockchain technology making it possible for people to purchase, sell or rent land using ElonTech tokens. We would like to provide digital services to the investors all over the world to obtain assets of Tech Valley by using ETCH no matter where they live .

ROADMAP

Upcoming Projects:

- Techvalley Announcement
- NFT Platform (Real Estate)
- Merchandise Store
- Crypto Academy
- Metaverse Adoption
- Development of Wallets & Market Place
- Development of Exchange
- Development of Launchpad / Incubator
- Evolution to DAO / Sub-DAO

PLANNED PARTNERSHIPS

ElonTech is working on making partnerships with online technology magazines, stores and eCommerce sites to improve the use-case of ETCH. Among others, Amazon, Meta, Twitter, Tesla etc. would be some of our major expected partners in future.

\$ETCH TOKENOMICS

Tokenomics of Elontech involves following details:

- **Started** - April 21,2021 (9:00AM GMT)
- **Total Supply** - 34,979,803,438,049.375
- **Total Burnt** - 11,513,478,366,118 - (32%)
- **Total tokens locked (Including Developer's)** - 21,657,319,369,950 - (62%)
- **Circulating Supply** - Less than 200 Billion
- **Staked** - Over 700 Billion Tokens
- **How many X's this year** - Almost 10x Every month. Max 56x
- **ATH** - 0.000058

BACKERS

Among Backers, there are some IT companies, Influencers, Private Investors and more.

GOALS

- To foster revolution in terms of Information Technology, including big data and crypto, with the help of the prodigious community.
- To mark enhanced and advanced footprint regarding Technology in the entire world with paramount emphasis on underdeveloped areas.
- Our ultimate Goal is to take the digital real estate industry to the next level by blockchain technology.
- We believe that blockchain is the most important technology of our times, a change like the one that brought the internet.
- Metaverses will become more and more popular in everyday life because they can amplify the user experience.
- After Facebook announced the change of name to Meta, a real gold rush broke out, especially in the DeFi world.
- In fact, those two technologies form a perfect union and just like the internet, blockchain can make the world a better place.
- The possibility of exploring other worlds, where we are all masters thanks to the blockchain and where the ownership of digital assets (NFT) can be held, opens the doors to a new working era.
- Our Goal is to move the Real Estate industry in that direction. Just as happens in the present digital art marketplaces on blockchain our goal is to replicate it, but in the real estate industry.
- We have the opportunity to open a new market segment and create jobs for digital architects and designers.
- In addition to creating revenue opportunities for investors and builders.

SPECIFICATIONS

ROADMAP & MILESTONES

Under Development

In underdevelopment - write the platform is underdevelopment and is accessible to close ETCH spartans who can test the platform.

Building Community

Community building was the most important part which we have focused on besides the other parts of the project. We have a huge community of 34K plus members on telegram. We have several

admins and moderators in our community and we have also implemented a very active and up to date bot of Telegram. We also have a handsome number of people in the Telegram group which works besides the admins and moderators voluntarily. Volunteers answer the queries of newcomers and the old ones and also try to keep the community motivated.

Building Marketplace

Real Estate NFT's property are transferred to investors and Holders. An Marketplace will be introduced. Which will be one of the most important features of the platform responsible for ensuring investment liquidity. Any operations concerning tokens will be executed just like traditional sale and purchase orders.

Even if there are no current sales offers for a given real property, each user will be able to publish a purchase offer for a specific facility. This information will appear in the buy order section and will be forwarded directly to its shareholders. The description of each real property will be constantly updated with the history of coupons paid. Important and reliable data regarding the economic situation of the real property market from a given area will be published under the news tab, which will also have an impact on the demand for assets under previous subscriptions.

Presale For Locked Group / Public Sale

TechValley assets will be first available to highly prestigious Spartans for acquisition. They will be given the first chance to acquire them. They can opt to acquire them using their locked tokens with the project Admin, which will be automatically airdropped as per a fixed ratio to their locked tokens. After this the locked tokens will be burnt. Also there is a proposal for Special Airdrop for Presale participants from Public Group. This will be decided by a community vote. For Spartans who locked tokens with Team Finance, this will be decided by a community vote, on proposal from Project Admin. All long time Holders / Spartans will be given handsome discounts for purchases made in ETCH, which will be decided at a later stage. All the ETCH tokens acquired during Presale and IDO / IEO / Public Sale will be burnt making ETCH even more scarce in supply driving it's demand and price. Early public sale participants will be given discounts only on purchases made with ETCH. All other purchases made in Fiat / BTCB / BNB / BUSD / ETH (Binance Smart Chain pegged) will be given discounts in descending order on a Tier basis and on FCFS basis.

Release Of Beta Version

Beta version of Platform to virtually handle properties like buy, sell, and rent them and even build them...It's beta version will be available for team and holders.

Final Release

Final release will be the final product of the Platform to handle all the stuff of tech valley including land, buildings, apartments, offices, robotics, and other assets etc. Final release will assist all the buyers and sellers of Tech Valley to buy and sell assets to each other with the standard currency of Tech Valley i.e. ETCH.

Land Acquisition

Over 300K hectares of land have been government approved and backed in order to prepare ElonTech for its expansive future in land and real estate through state-of-the-art NFTs. Those who purchase ETCH will be able to trade with others, including receiving rent from those who build on your purchased land. Many more exciting details will be revealed during the launch of tech valley!

Building Physical Tech Valley

A percentage of trade taxes will be allocated toward the procurement of land for the physical construction of Tech Valley. Multiple locations will be compared and analyzed to optimize the efficiency of development, minimize negative impact on the environment, and maximize the positive financial impact on nearby communities.

REACH OUT AND MARKETING

We reach out to our community frequently via Telegram and Twitter handles. We also perform some activities with our community and by this we could know about the large number of our investors and about ones who want this project to flourish and want to get involved in decision making of this project.

We discuss relevant things with investors which are sorted out and also keep them motivated to also grasp their suggestions from community groups.

We set out a few marketing campaigns in the previous months in which we reached out to multiple youtubers of different countries to market our project. Those youtubers made worthy contents in their local languages to attract their local audience for the project. We have also planned huge marketing campaigns on our great achievements so that most people in the crypto world could know the hidden gem and to invest in its future.

Examples of some good YT videos with future plans of ETCH

1. <https://youtu.be/hVQqN253FI8>
2. <https://youtu.be/WaLQ9kdifJ8> (Tamil)

ACHIEVEMENTS

1. 40k+ Holders
2. 56x Price movement in the first 3 weeks.
3. Ownership Renounced
4. Supply under 300 Billions from 34 Trillions in 8 months.
5. Huge community building
6. Staking & Pools
7. CMC Listing
8. Certik Audit
9. TechRate Audit
10. Eth Bridge
11. NFT Platform (Real Estate)
